

Cristian Castro

software developer | web developer

BRIEF SUMMARY

I'm a software developer with a strong focus on web application development, with experience in Python, Django, PHP, JavaScript, and more.

I also have a big interest in DevOps culture and methodology. Implementing solutions on Linux, Docker, and Nginx as a web server and reverse proxy.

PROFESSIONAL EXPERIENCE

Backend Developer

Dicop Consulting - IT Consultancy
November 2024 - Present

- Programming with JavaScript, Python, and Django using MVC.
- Refactoring and solving problems in existing projects.
- Working with relational databases like SQLServer using ORM.
- Integrating third-party RESTful APIs.
- Managing and documenting project architecture, ensuring all projects follow the same standard.
- Implementing, managing, and deploying Linux servers with Docker and Nginx as a reverse proxy.

Software Developer

Freelancer
September 2024 - Present

- I developed a digital platform that allows restaurants to update their menu in real time, making it easy for customers to access information by scanning a QR code. 📱
- I implemented a secure and optimised REST API with Django REST Framework, integrating front-end and back-end for a smooth, modern experience.
